EDUCATION

2022 - 2026

IQRA UNIVERSITY

- Bachelor's in Computer Science

2019 - 2021

SIR SYED GOVT. COLLEGE

- Higher Education

TECHNICAL SKILLS

FRONTEND

React.js , TypeScript , JavaScript (ES6+), HTML5 / CSS3 , Responsive Design , PWA (Service Workers, Web App Manifest, Offline Caching)

BACKEND

Node.js , Express.js , REST API Development , Authentication (JWT, Sessions)

DATABASE

MySQL , MongoDB , SQL Server

CLOUD & TOOLS

Railway , Vercel , Netlify , Git , GitHub , CI/CD (GitHub Actions) , Docker (Basic)

OTHER

React Native , Basic AWS , Cybersecurity Fundamentals

PROFILE SUMMARY

Full-Stack MERN Developer with hands-on experience building and deploying scalable web applications. Strong in backend API development, authentication systems, and cloud deployment. Experienced in React, Node.js, MongoDB, and modern JavaScript frameworks. Passionate about building secure, production-ready applications and solving real-world technical challenges.

WORK EXPERIENCE

Freelance MERN Stack Developer — Self-Employed | 2026–Present

- Built multiple full-stack apps using React.js / React Native and Node.js (Express).
- Led a 4-member team to develop a Hotel Management System; designed ER diagrams and optimized SQL (↓ data redundancy 30%).
- Implemented CI/CD pipelines for personal projects using GitHub Actions.

Craftech Software House — React Native & WordPress Developer (Outsourced)

- Worked as an outsourced developer, building and maintaining websites and applications using React Native and WordPress.

SOFT HOUSE (Pvt.) Ltd. — Junior WordPress Developer (Intern) | Jul 2025 – Nov 2025

- Assisted in developing and maintaining WordPress websites, customizing themes and plugins for project requirements.
- Performed UI adjustments using HTML, CSS, and JavaScript and collaborated with the team to troubleshoot issues.

PROJECTS

Maxis Energy — Solar Company Website & Admin Platform

Full-Stack | React + Node.js + MongoDB | Production VPS

Designed, built, and deployed a production full-stack web platform for Maxis Energy, a solar installation company in Pakistan.

- Public marketing website with project showcase and testimonials
- Custom admin panel (CRUD) for managing projects, events, certificates
- Self-hosted on Hostinger VPS: Nginx reverse proxy, PM2, Let's Encrypt SSL
- MongoDB with automated daily backups and disaster recovery
- JWT-authenticated admin panel with image/video upload (Multer)

Tech: React • TanStack Router • Node.js • Express • MongoDB • Nginx • PM2

Safargo — Integrated Real-Time Ticket Booking System (FYP)

Full-Stack Cross-Platform | React Native + Node.js + SQL Server

Co-developed a real-time flight and train ticket booking system with cross-platform support (Android + Web)

- Built scalable backend APIs with Node.js & Express

CERTIFICATION

- Diploma in Web3 & Metaverse | GIAIC, Karachi | 2024–2026 | (Expected)
- Certified Digital Marketer - Iqra University (26 JULY 2025 - 30 JULY 2025)
- Certified Ethical Hacker - NED university (2024)
- Participation in ElectroBuild Competition - Iqra University (2023)

SOFT SKILLS

- Problem Solving
- Team Collaboration
- Adaptability

LANGUAGES

- English (Fluent)
- Urdu (Fluent)

- Engineered revenue-based redirect tracking to monitor booking conversions
- Designed admin panel for analytics and performance monitoring
- Implemented session tracking, RBAC, and authentication
- Collaborated using Git in agile-style workflow (2-3 developers)

Tech: React Native • Node.js • Express • SQL Server • JWT

Video Demo: <https://my-portfolio-silkdelta98.vercel.app/projects/safargoo#how-it-works>

MediTrack — Healthcare Management System

Full-Stack | React + Node.js + MongoDB | Role-Based Access Control

Built a healthcare platform with multiple user roles (Doctor, Receptionist, Admin) and enterprise-level security.

- Role-based dashboards for Doctor, Receptionist, Admin workflows
- Appointment booking, medical records, and prescription management
- Implemented JWT authentication and role-based access control
- Admin analytics and user management features

Tech: React • Node.js • Express • MongoDB • JWT

Salary & Expense Manager

Full-Stack | React + Node.js + MongoDB | AWS EC2 Deployment

Personal finance tracking application with secure workflows and actionable financial insights.

- JWT-protected routes with secure token handling
- Categorized income/expense tracking with balance trends
- Interactive charts using Recharts for financial visualization
- Production deployment on AWS EC2 with Nginx and PM2

Tech: React • Vite • Node.js • MongoDB • AWS EC2 • Nginx • PM2
